

MINI BLOWING JUNCTION BLOCK KIT

The Mini Blowing Junction Block is the perfect accessory for any fiber blowing engineer.

The Fremco mini blowing junction block is originally developed for straightening a cable when blowing in two directions, and there is a loop left because the regular blowing machine does not fit into the manhole.

It can also be used to blow a cable (by hand in short distances) from a narrow spot where there is no room for a regular blowing machine or as a low cost hand held fiber blowing device.

It is made from surface treated aluminum and can withstand the air pressure being used in any fiber network. It uses the same type/size of seals as the Fremco Miniflow RAPID.

A) Microduct, B) Cable

Mini Blowing Junction Block Kit

Item No.: 103-180314001

The kit contains:

- 1 pcs Mini blowing junction block (manual cable blowing into 8-12 mm microducts)
- 2 pcs cable seals in all sizes between 3 to 7.5 mm.
- 1 pcs Allen key
- 1 pcs 12-8 mm reducer
- 1 pcs 12-10 mm reducer
- 2 pcs of 12 mm microduct
