

SPONGES FOR DUCT CLEANING

For optimal fiber blowing conditions

Save time and money by preparing the duct before initiating your fiber blowing job.

Cleaning the duct prior to blowing the fiber create a smoother fiber blow. It also secures the fiber, as dirt or stones that find its way into the duct during installation gets removed during cleaning. This can minimize costly errors.

The sponges can both be used for cleaning and for lubricating the duct.

Why Fremco sponges?

- The cylinder shape makes them more stable in the duct as they do not roll around.
- Due to the density of the material, they absorb the right amount of lubrication and do not crumble away.
- The different selection of sizes ensures you can clean and lubricate the whole duct.
- Due to its white colour, it is much easier to see when the sponge is dirty and used up.

NANOFLOW, NANOFLOW MAX, MICROFLOW TOUCH AND MICROFLOW LOG

Sponges diameter	Inner duct dimension	Item No.	Pack size
5 mm	2.5-4.0 mm ID	103-2005060	100 pcs.
8 mm	4.0-6.0 mm ID	103-2008060	100 pcs.
12 mm	6.0-9.0 mm ID	103-2012060	100 pcs.

MINIFLOW RAPID

Sponges diameter	Inner duct dimension	Item No.	Pack size
8 mm	4.0-6.0 mm ID	103-2008060	100 pcs.
12 mm	6.0-9.0 mm ID	103-2012060	100 pcs.
18 mm	9.0-14 mm ID	103-2018060	50 pcs.
28 mm	14-21 mm ID	103-2028060	20 pcs.

POWERFLOW RAPID AND MULTIFLOW RAPID

Sponges diameter	Inner duct dimension	Item No.	Pack size
12 mm	6.0-9.0 mm ID	103-2012060	100 pcs.
18 mm	9.0-14 mm ID	103-2018060	50 pcs.
28 mm	14-21 mm ID	103-2028060	20 pcs.
45 mm	21-35 mm ID	103-2045060	10 pcs.
50 mm	25-45 mm ID	103-2050060	10 pcs.
60 mm	30-50 mm ID	103-2060060	10 pcs.
